

DIY Bug Catchers

Here at KingKids we have shown a huge interest in bugs! To extend on our interests we thought it would be fun to make our own unique bug catchers! We would love to see your creations, so please send us photos!

Here are some suggestions of at home items you could use:

- Shoe box, milk carton, cereal box, containers, jars, etc.

Steps:

1. Collect your item of choice.
2. Cut some doors and windows for your new bug friends.
3. Fill your bug catchers with natural materials such as grass, plants, dirt, soil, leaves, etc.
4. You can also add some bug food such as small pieces of fruit.
5. Now hide your bug catcher somewhere in your garden (out of the weather) and wait for your bug friends to arrive!
