

# WEEK 1 RESOURCE PACKS

# I'M A ROCKET!!

For this activity you will need:

- Coloured paper or white paper
- Pencils and Texters

Instructions:

1. First, cut out a triangle to make the top of the rocket ship
2. Make multiple squares and you can dot out your child's name and ask them to practice writing out their name.
3. You can also, write the letters in your child's name on the different square papers and thereafter on a separate piece of paper write your child's whole name and ask them to identify the letters and make their name to complete the Rocketship
4. To finish the Rocketship, cut out a rectangle and paste it at the bottom of their name.
5. You can then ask your child to colour and decorate their Rocketship.

# SQUISHY PAINT SUN

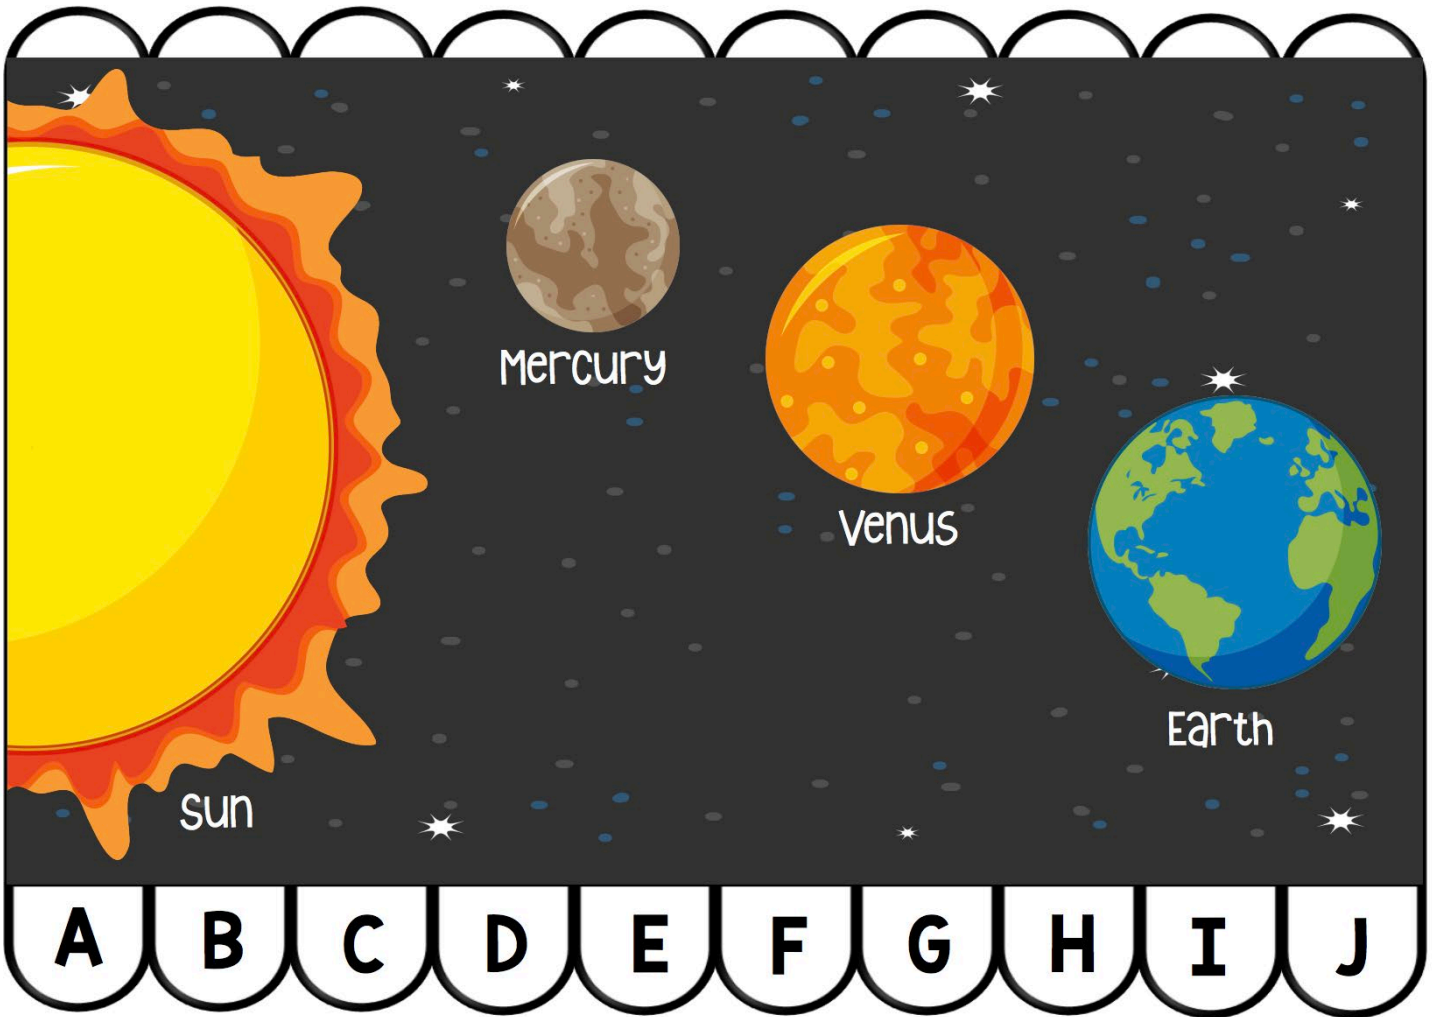

## Materials needed:

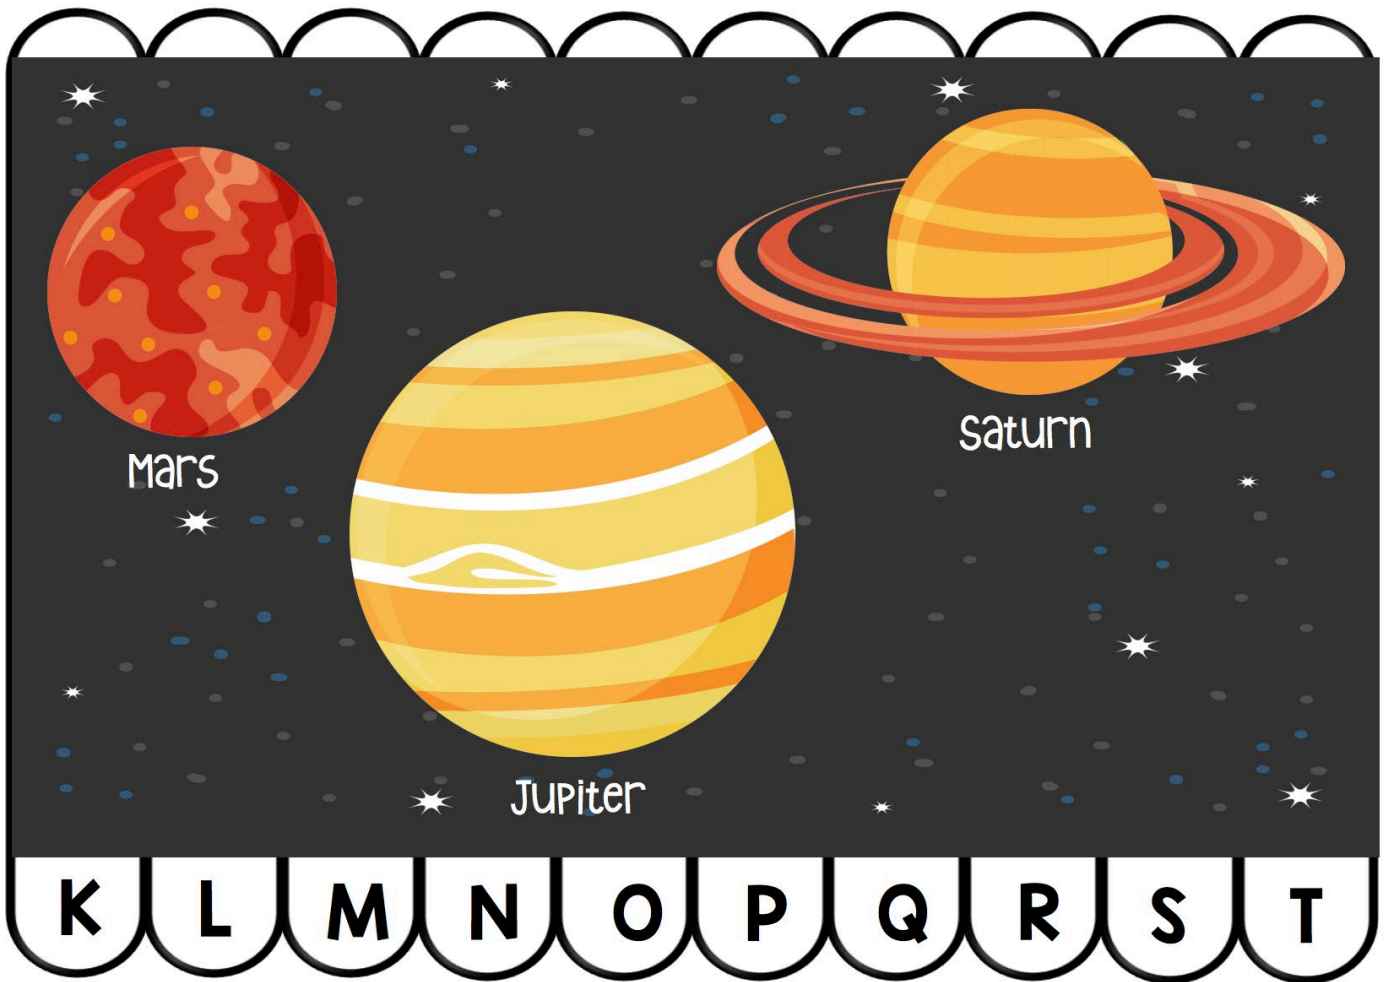

- Paper
- Paint / Food colouring
- Cling wrap

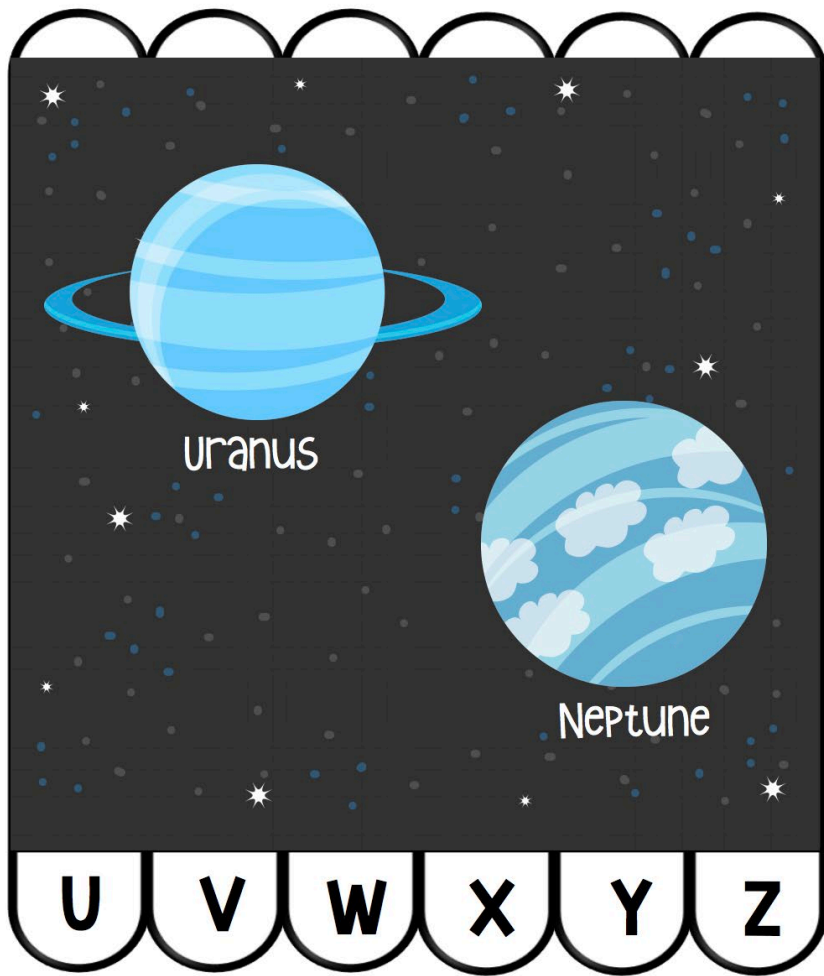

## Instructions

Cut a circle and get the children to paste it on another piece of paper. Drop different coloured paint on the circle and thereafter place the cling wrap on top and ask your child to swirl the paint around to create their own design of a sun. They will get the chance to see different coloured mixing to make different colours

OUTER SPACE ALPHABET PUZZLE

© 2016 teachingmama.org

### Instructions

To create this puzzle, cut each letter apart and glue them onto craft sticks. Then have your child put the puzzle together by either solving the picture or putting the letters in alphabet order. To assist your child in putting the alphabet in order, have an ordered alphabet in front of your child for them to use as a sample.

## CREATIVITY WITH SCRAPS

### Materials

- Cardboard boxes/Cereal boxes
- Plastic bottle
- Paper
- Sticky tape

Children love using their imagination and further enjoy being able to use sticky tape and stick different materials together. Using recycled materials enables the opportunity to teach children about sustainability and how they can do their part to preserve the environment.

To create this Rocketship

1. Cut two triangles from the cardboard boxes
2. Get your children to stick the two triangles on either side of the plastic bottle
3. With a piece of paper, roll it into a cone and stick it on top of the bottle

Thereafter your children can use this in their imaginative play.
